Course Outline

This package includes these courses

- Adobe After Effects Course Online (18 Hours)
- After Effects Advanced Course Online (18 Hours)
- After Effects Compositing, Tracking, & Keying Course Online (18 Hours)

Adobe After Effects Course Online

Learn to create professional motion graphics and visual effects using Adobe After Effects. This course covers animation techniques, text effects, and file integration to help you build engaging video content.

- Animate text, images, and graphics using position, scale, rotation, and opacity controls.
- Work with masks and track mattes to create seamless transitions and layered effects.
- Apply blending modes and transparency effects for dynamic visual compositions.
- Integrate and animate Photoshop and Illustrator files within After Effects.
- Use expressions and essential properties to streamline animation workflows.
- Export high-quality video files optimized for web, social media, and professional use.

After Effects Advanced Course Online

Through real-world projects, you'll develop polished, professional animation techniques while learning to streamline your process with expressions and scripts. By the end, you'll be equipped to create sophisticated, visually compelling motion pieces and confidently tackle more complex creative challenges.

- Work with 3D layers, cameras, and lights to create dynamic scenes
- Create and animate custom shape layers using the Pen tool
- Develop advanced text animations and save presets for future use

- Optimize animations with expressions and wire parameters for complexity
- Enhance audio integration by adding markers and applying audio effects

After Effects Compositing, Tracking, & Keying Course Online

Build advanced compositing skills in After Effects by learning keying, rotoscoping, and motion tracking techniques. This course shows you how to seamlessly combine 2D and 3D elements within your video projects.

- Learn motion tracking techniques using Point Tracker and Mocha AE
- Combine 2D and 3D graphics with video in After Effects
- Stabilize footage and remove green screen backgrounds
- Create slow-motion and fast-motion effects using time remapping
- Rotoscope footage and build track mattes for visual effects
- Remove unwanted elements from video using Content-Aware Fill
