COURSE SYLLABUS

Data Analytics Foundations Course Online

Learn the fundamentals of data analytics, including descriptive and inferential statistics, and how various industries and organizations rely on data for forecasting and decision making. Explore statistical analysis and modeling, covering statistical algorithms, theorems, and models.

> Group classes (Live Online) and onsite training are available for this course. For more information, email partnerships@vdci.edu or visit: https://vdci.edu/courses/data-analytics-foundations-online

Course Outline

Basic Data Analysis

- Measures of Central Tendency
- Measures of Position
- Measures of Dispersion
- The Normal Curve
- Descriptive Statistics

Predictive Analytics I

- Forecasting
- Series Forecast

Data Visualization I

- Charts
- Icon Sets
- Histograms
- Moving Average

Predictive Analytics

- Correlation
- Regression - overview
- Regression - analysis
- Linear regression
- Multiple regression

Probability

- Probability I
- Probability II
- Binomial Probability
- Poisson Probability

Prescriptive Analytics I

- What If Analysis
- Data Table (3 variables)
- Scenario Manager
- Scenario Manager - Pivot

Data Visualization II

- Sparklines
- Color Scales
- Drawing Shapes
- Pivot Tables
- Pivot Charts

Prescriptive Analytics II

- Solver - overview
- Linear Programming
- The Solver model
- Non-Linear Programming
- Evolutionary Solver
