Course Outline

This package includes these courses

- Project Management Level I Online (6 Hours)
- Project Management Level II Online (6 Hours)

Project Management Level I Online

Learn the core strategies, methods, and terminology used in project management. Build practical knowledge of the five stages of the project lifecycle with an emphasis on Initiation and Planning, and gain a clear understanding of the skills and responsibilities required of an effective Project Manager.

- Learn the five phases of project management with a focus on Initiation and Planning
- Understand key foundational concepts and common project management terminology
- Explore project selection, defining scope, planning and scheduling work, managing resources, and more
- Gain familiarity with the roles, responsibilities, and essential qualities of a Project Manager

Project Management Level II Online

Develop advanced project management skills by focusing on the execution, monitoring, and closing phases. Learn how to manage budgets, resources, and risk, and explore Agile Project Management along with widely used frameworks such as Scrum, Kanban, and XP.

- Continue building knowledge of the five phases of project management with a focus on Execution, Monitoring, and Closing
- Understand project costs, budgeting principles, and financial tracking
- Learn effective approaches to managing people, time, and resources
- Develop strategies for handling risk, change, and uncertainty
- Gain an overview of Agile Project Management frameworks, including Scrum, Kanban, and Extreme Programming (XP)
